SUMMARY

Detail-oriented and analytical BCA student with hands-on experience in data handling and operational automation. Adept at organizing large datasets, identifying trends, and supporting smooth workflows — eager to contribute to operational and product management tasks in a fast-paced environment.

EXPERIENCE

SDE 1 – Intern | SecureDApp | Remote | Sep 2025 – Dec 2025

- Built and managed automation bots for Reddit and Twitter to simulate user actions such as navigation, posting, and data handling, reducing manual effort.
- Organized and analyzed structured test data using Excel — tracked 20+ bug reports with status, priority, and resolution details across 5+ web application modules.
- Developed a contactless fingerprint authentication demo, gaining understanding of biometric systems and security flows.
- Supported end-to-end operational testing workflows by identifying functionality gaps, logging issues, and verifying fixes — ensuring smooth and reliable system performance.

PROJECTS

Placement Intelligence Dashboard | [Live App](#)

- Collected, cleaned, and analyzed 10,000 student records using Excel and Python (Pandas), organizing data across multiple variables to identify placement trends and performance patterns.
- Built an interactive Power BI dashboard with 6 filters enabling stakeholders to explore data by CGPA, skills, and internship status — turning raw data into clear, actionable product insights.
- Conducted research analysis across 15 academic and personal features; discovered that communication skills — not CGPA — are the strongest predictor of placement success.
- Delivered a deployed Streamlit application enabling 500+ students to self-serve insights without technical knowledge, improving operational efficiency of the placement advisory process.

AI Career Coach Chatbot | [Live App](#)

- Developed an AI-powered assistant that analyzes resumes against job descriptions and generates a match score with personalized improvement suggestions, streamlining job preparation workflows.
- Built tailored career roadmap generation for 3 user personas (students, professionals, career changers), demonstrating ability to identify and serve different user segments with structured guidance.
- Designed an end-to-end interactive interface handling content research, trend identification, and user engagement — directly paralleling social media content research and operational support tasks.
- Integrated NLP-based keyword extraction to surface actionable insights from unstructured text, with results reported in a clean, organized format accessible to non-technical users.

SKILLS

Data & Excel: MS Excel (Pivot Tables, VLOOKUP, basic formulas), Python (Pandas), SQL, Power BI

Concepts: Fundamentals of DSA, AI, Machine Learning, Data Analysis

Soft Skills: Good Communication, Multi-tasking, Team Collaboration, Problem Solving

EDUCATION

Bachelor of Computer Applications (BCA) | KLE's BCA PC Jabin Science College, Hubballi | Sep 2023 – Present | CGPA: 8.97 / 10

CERTIFICATIONS

Deloitte Australia – Data Analytics Job Simulation (Forage, 2025) | **Tata Group – Data Visualisation Job Simulation** (Forage, 2025) | **Microsoft Data Analyst 101** (Simplilearn, 2025)
